

# Victaulic® Vic-300 MasterSeal™ Butterfly Valve

## Series 761

08.20

10-Position Handle

Lever Lock Handle

Gear Operator

### 1.0 PRODUCT DESCRIPTION

#### Available Sizes

- 2 – 12"/DN50 – DN300

#### Maximum Working Pressure

- Accommodates pressures ranging from full vacuum (29.9 in Hg/760 mm Hg) up to 300 psi/2100 kPa/21 bar
- Full working pressure for bi-directional, dead end services

#### Operating Temperature

- Dependent on seat selection from section 3.0

#### Application

- For use in carbon steel, ductile iron, and plastic piping systems.

#### NOTE

- Not recommended for use in stainless steel piping or copper tubing systems. Refer to [publication 17.40](#): Victaulic Vic-300 MasterSeal™ Stainless Steel Butterfly Valve – Series 461 or [publication 22.14](#): Victaulic Copper Connection Butterfly Valve – Series 608N for more information.

#### Actuation Options

- Standard ISO 5211 mounting flange
- 10-position handle (2 – 6"/DN50 – DN150)
  - Infinitely variable service with memory stop; Padlockable
- Lever lock handle (8 – 12"/DN200 – DN300)
  - Infinitely variable service with memory stop; Padlockable
- Gear operator (2 – 12"/DN50 – DN300)
- Additional 2"/50 mm neck extension available when more than 2"/50 mm of insulation is needed
- 4 ½"/120 mm-long handle wheel input shaft extension (2 – 8"/DN50 – DN200)
- 3 ½"/90 mm-long handle wheel input shaft extension (10 – 12"/DN250 – DN300)

#### NOTES

- A padlockable valve refers to those valves which can be padlocked to lockout equipment for preventing inadvertent valve operation. When used in conjunction with an appropriate lockout/tagout system, multiple padlocks may be used. The valve may be padlocked either fully open or fully closed.
- A tamper-resistant option is also available, which is meant to deter theft, vandalism or other malicious activity. The handles and associated components are assembled with tamper-resistant fasteners which are designed for one-time assembly. Attempts to defeat the padlock by partial disassembly of the valve will likely result in evidence of such activity. The valve may be padlocked either fully open or fully closed.
- Handwheel input shaft extensions are not for use with chainwheels.

**ALWAYS REFER TO ANY NOTIFICATIONS AT THE END OF THIS DOCUMENT REGARDING PRODUCT INSTALLATION, MAINTENANCE OR SUPPORT.**

## 2.0 CERTIFICATION/LISTINGS

---

When utilizing a Victaulic EPDM seat, a stainless steel disc and standard trim and coating, the Series 761 in sizes 2 – 12"/DN50 – DN300 is UL Classified in accordance with ANSI/NSF 61 for cold +73°F/+23°C potable water service and ANSI/NSF 372.

When utilizing a Victaulic EPDM seat, a ductile iron disc with electroless nickel coating, and standard trim and coating, the Series 761 in sizes 3 – 12"/DN80 – DN300 is UL Classified in accordance with ANSI/NSF 61 for cold +73°F/+23°C potable water service and ANSI/NSF 372.

When utilizing a Victaulic EPDM seat, an aluminum bronze disc, and standard trim and coating, the Series 761 in sizes 2 – 6"/DN50 – DN150 is UL Classified in accordance with ANSI/NSF 61 for cold +73°F/+23°C potable water service and ANSI/NSF 372.

The Series 761 in sizes 76.1 mm, 88.9 mm, 114.3 mm, 165.1 mm, 168.3 mm, 219.1 mm and 273.0 mm have CCC approval. Valve construction and performance meet or exceed MSS-SP-67 requirements.

Compliant with Closure/Seat Leakage Rate A per EN 12266-1, EN 1074-1, EN 1074-2 and ISO 52.

### NOTE

- See [publication 02.06](#): Victaulic Approvals for Potable Water Products - ANSI/NSF 61 and ANSI/NSF 372 for more details.

---

## 3.0 SPECIFICATIONS – MATERIAL

---

### Series 761 Vic-300 MasterSeal™ Butterfly Valve

**Body:** Ductile iron conforming to ASTM A536, Grade 65-45-12.

**End Face, 2 – 6"/DN50 – DN150:** Ductile iron conforming to ASTM A536, Grade 65-45-12.

**Seal Retainer, 8 – 12"/DN200 – DN300:** Ductile iron conforming to ASTM A536, Grade 65-45-12.

**Coating:** Black alkyd enamel.

### Disc: (specify choice)

Standard: Ductile iron conforming to ASTM A536, Grade 65-45-12, with electroless nickel coating conforming to ASTM B733.

Optional: Stainless steel, conforming to ASTM A351, Grade CF8M.

Optional: 2 – 6"/DN50 – DN150 only – Aluminum bronze, Grade C95500.

### Seat: (specify choice)

#### Victaulic EPDM

EPDM (Green color code). Temperature range –30°F to +230°F/–34°C to +110°C. UL Classified in accordance with ANSI/NSF 61 for cold +73°F/+23°C potable water service and ANSI/NSF 372. NOT RECOMMENDED FOR PETROLEUM SERVICES OR STEAM SERVICES.

#### Victaulic Nitrile

Nitrile (Orange color code). Temperature range +10°F to +150°F/–12°C to +65°C. Not compatible for hot water services over +150°F/+66°C or for hot dry air over +140°F/60°C. NOT RECOMMENDED FOR HOT WATER SERVICES OR STEAM SERVICES.

#### Victaulic Fluoroelastomer

Fluoroelastomer (Blue color code). Temperature range +20°F to +300°F/–7°C to +149°C. NOT RECOMMENDED FOR HOT WATER SERVICES OR STEAM SERVICES

### Stem:

Standard: 416 stainless steel conforming to ASTM A582.

Optional:<sup>1</sup> 17-4PH stainless steel conforming to ASTM A564.

### Stem Seal Cartridge:

Standard: C36000 brass.

Optional:<sup>1</sup> 17-4PH stainless steel conforming to ASTM A564.

<sup>1</sup> Contact Victaulic for available material combination options.

### 3.0 SPECIFICATIONS – MATERIAL (Continued)

---

**Bearings:** Fiberglass and 316 stainless steel with TFE lining.

**Stem Seal:** Furnished in same material as seat.

**Stem Retaining Ring:** Carbon steel.

#### 10 Position Handle:

For sizes 2 – 6"/DN50 - DN150: Zinc-plated carbon steel handle with zinc-plated carbon steel latch plate and zinc-plated carbon steel fasteners, infinitely variable, padlockable and includes memory stop. Optionally available with tamper-resistant hardware.

#### Lever Lock Handle:

For size 8"/DN200: Painted ductile iron conforming to ASTM A536, Grade 65-45-12, with carbon steel latch plate and zinc-plated carbon steel fasteners.

For size 8"/DN200: Infinitely variable, padlockable and includes memory stop. Optionally available with tamper-resistant hardware.

For sizes 10 – 12"/DN250 - DN300: Painted ductile iron conforming to ASTM A536, Grade 65-45-12, with carbon steel handle extension and zinc-plated carbon steel fasteners.

#### Gear Operator (with options below):

Handwheel with memory stop.

Handwheel with chainwheel.

2" square nut.

Thermal barrier.

### 4.3 DIMENSIONS

#### Accessories

##### Chainwheels

Chainwheels are mounted to the gear operator handwheels. Sprocket rim and guide arms are made of cast aluminum. Chain is galvanized steel.

##### HOW TO ORDER:

Specify type valve and operator by valve numbering system shown on page 13.

Always specify length of chain required.

For insulation and locking device, contact Victaulic for details. Handwheel input shaft extensions are not for use with chainwheels.

Chainwheel and Guide  
with Safety Cable Kit

## 5.0 PERFORMANCE

### Series 761 Vic-300 MasterSeal™ Butterfly Valve

C<sub>v</sub>/K<sub>v</sub> values for flow of water at +60°F/+16°C with various disc positions are shown in the table below.

Formulas for C<sub>v</sub>/K<sub>v</sub> values:

$$\Delta P = \frac{Q^2}{C_v^2}$$

$$Q = C_v \times \sqrt{\Delta P}$$

**Where:**

Q = Flow (GPM)

ΔP = Pressure Drop (psi)

C<sub>v</sub> = Flow Coefficient

$$\Delta P = \frac{Q^2}{K_v^2}$$

$$Q = K_v \times \sqrt{\Delta P}$$

**Where:**

Q = Flow (m<sup>3</sup>/hr)

ΔP = Pressure Drop (Bar)

K<sub>v</sub> = Flow Coefficient

<sup>3</sup> Japanese Industrial Standard (JIS) size.

#### Source:

These torque values were derived from test data with non-lubricated valves in water at ambient temperatures with EPDM seals. For other material and service conditions, apply a suitable service factor.

#### Torque Factors:

All torque values are for normal conditions (i.e., the valve is operated at least once a quarter, disc corrosion is expected to be minor, the media is clean and nonabrasive, and the chemical effects upon the elastomer are minor).

#### Typical Fluid Torque Factors Commonly Used in the Industry:

Water: 1.0; Lubricated service: 0.8; Dry gases: Lubricated nitrile “T” seat seals may be specified for dry gases wherever chemically appropriate. See material torque factor below.

#### Material Torque Factors:

“E” = 1.0; “O” = 1.2; “T” = 0.8

#### Cycling Factor:

Torque will typically increase as the valve is cycled. A factor of 1.5 should be applied for the first 5,000 cycles and another 1.5 applied for all additional cycles. The higher number should be used if there is more than one cycle per hour.

## 5.1 PERFORMANCE (Continued)

### Actuation Factor:

There are no actuation safety factors applied. A factor consistent with the consequences of not actuating should be applied. A minimum factor of 1.2 is recommended for directly actuated valves.

### Combining Torque Factors:

When multiple torque factors apply, they are combined by multiplying them. Example: For an EPDM seal and a 5,000-cycle factor, the combined factor would be  $1.0 \times (1.5) = 1.5$ .

### NOTES

- Under certain high flow conditions, the hydrodynamic torque can exceed the seating torque. Large butterfly valves are not recommended for use in a free discharge condition, such as filling an empty line with fluid at the full-rated pressure.
- Contact Victaulic for other services.

## 5.2 PERFORMANCE

### Series 761 Vic-300 MasterSeal™ Butterfly Valve

#### Typical Specifications

Butterfly valves 2 – 12"/DN50 – DN300 shall be rated to 300 psi/2068 kPa/21 bar and be suitable for bi-directional and dead-end service from full vacuum to full-rated pressure. Body material shall be ductile iron with blowout proof stainless steel stems and electroless nickel coated ductile iron disc. Seat material shall be EPDM and have a full 360° continuous contact with the seating surface. Stem seals shall be of the same material grade as the seats. Disc shall be offset from the centerline of the stems and shall be connected to the stem without the use of fasteners or pins. Valve ends shall be grooved. Valve shall have standard ISO flange mounting for ease of actuation. Operators shall be as specified by choice in valve table. The standard handle valve 2 – 12"/DN50 – DN300 shall include latch lock, infinitely variable and memory stop features. Manufacturer – Victaulic – Vic-300 MasterSeal Valve or approved equal. Valve with EPDM seat is UL classified to ANSI/NSF 61.

### 5.3 PERFORMANCE

#### Series 761 Vic-300 MasterSeal™ Butterfly Valve

##### Important Installation Considerations

When installing a Victaulic butterfly valve into a piping system, follow the instructions supplied with the coupling. Refer to the notes below for applications/limitations.

When using butterfly valves for throttling service, Victaulic recommends the disc be positioned no less than 30 degrees open. For best results, the disc should be between 30 and 70 degrees open. High pipeline velocities and/or throttling with the disc less than 30 degrees open may result in noise, vibration, cavitation, severe line erosion, and/or loss of control. For details regarding throttling services, contact Victaulic.

Victaulic recommends that flow velocities for water service are limited to 10 ft. per sec./3 m per sec. When higher flow velocities are necessary, contact Victaulic. When dealing with flow media other than water, contact Victaulic.

Victaulic recommends good piping practices and installing the valve five pipe diameters downstream of sources of irregular flow, such as pumps, elbows and control valves. If not practical due to space constraints, the system should be designed to locate and orient the valve to minimize the impact of dynamic torque and valve life.

Victaulic butterfly valves are designed with grooved ends for use with grooved pipe couplings. If flange connections are required, refer to the following notes regarding Vic-Flange® Adapter restrictions.

- Style 741 Vic-Flange Adapters can be used on all sizes of Series 761 Vic®-300 MasterSeal™ Butterfly Valves.
- Style 743 Vic-Flange Adapters cannot be used with Series 761 Vic®-300 MasterSeal™ Butterfly Valves. A No. 46 ANSI 300 groove by flange adapter is required.

DO NOT INSTALL BUTTERFLY VALVES INTO THE SYSTEM  
WITH THE DISC IN THE FULLY OPEN POSITION.

## 6.0 NOTIFICATIONS

### WARNING

- **Read and understand all instructions before attempting to install, remove, adjust, or maintain any Victaulic piping products.**
- **Depressurize and drain the piping system before attempting to install, remove, adjust, or maintain any Victaulic piping products.**
- **Wear safety glasses, hardhat, and foot protection.**

**Failure to follow these instructions could result in death or serious personal injury and property damage.**

### User Responsibility for Product Selection and Suitability

Each user bears final responsibility for making a determination as to the suitability of Victaulic products for a particular end-use application, in accordance with industry standards and project specifications, and the applicable building codes and related regulations as well as Victaulic performance, maintenance, safety, and warning instructions. Nothing in this or any other document, nor any verbal recommendation, advice, or opinion from any Victaulic employee, shall be deemed to alter, vary, supersede, or waive any provision of Victaulic Company's standard conditions of sale, installation guide, or this disclaimer.

### Intellectual Property Rights

No statement contained herein concerning a possible or suggested use of any material, product, service, or design is intended, or should be construed, to grant any license under any patent or other intellectual property right of Victaulic or any of its subsidiaries or affiliates covering such use or design, or as a recommendation for the use of such material, product, service, or design in the infringement of any patent or other intellectual property right. The terms "Patented" or "Patent Pending" refer to design or utility patents or patent applications for articles and/or methods of use in the United States and/or other countries.

### Note

This product shall be manufactured by Victaulic or to Victaulic specifications. All products to be installed in accordance with current Victaulic installation/assembly instructions. Victaulic reserves the right to change product specifications, designs and standard equipment without notice and without incurring obligations.

### Installation

Reference should always be made to the Victaulic installation handbook or installation instructions of the product you are installing. Handbooks are included with each shipment of Victaulic products, providing complete installation and assembly data, and are available in PDF format on our website at [www.victaulic.com](http://www.victaulic.com).

### Warranty

Refer to the Warranty section of the current Price List or contact Victaulic for details.

### Trademarks

*Victaulic* and all other Victaulic marks are the trademarks or registered trademarks of Victaulic Company, and/or its affiliated entities, in the U.S. and/or other countries.
